

Outage Recovery Without the Cost

Calculate Your ROI with This Worksheet

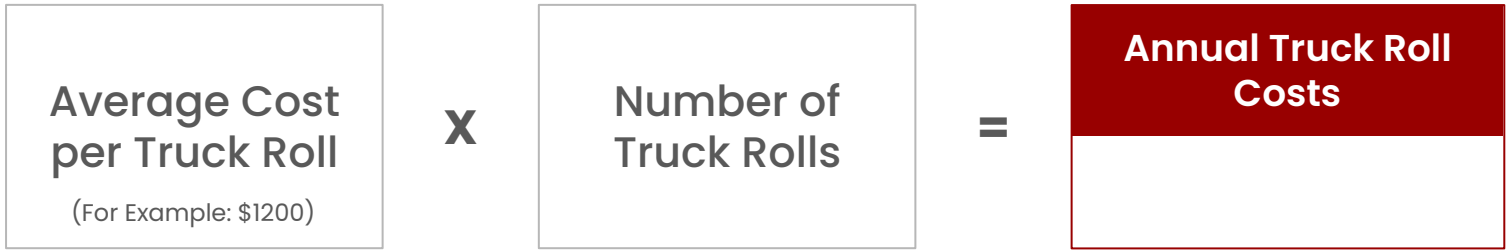

Truck rolls and downtime are expensive. ISPs spend thousands every year sending technicians to remote sites and losing revenue during outages.

Nodegrid eliminates most of these costs through remote out-of-band access and faster recovery.

Use this worksheet to estimate your potential savings and ROI.

Step 1:

Annual Truck Roll Costs

**Step 2:**

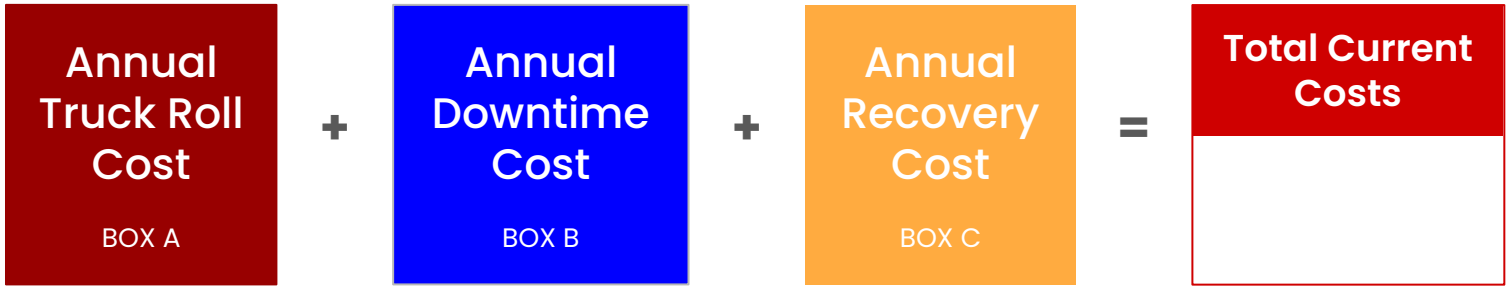

Annual Downtime Costs

**Step 3:**

Recovery & Operational Costs

Step 4: Total Current Costs

Potential Nodegrid Savings

Nodegrid Reduces:

- Truck rolls by 50%+
- Downtime impact by 60-70%
- Recovery effort by 40%

Apply these reductions to your total calculated in the above sections

Examples	Results
\$20,000 Annual Truck Roll Costs x 50% =	\$10,000 in Annual Savings
\$100,000 Annual Downtime Costs x 60% =	\$60,000 in Annual Savings
\$75,000 Annual Recovery Costs x 40% =	\$30,000 in Annual Savings
Total Annual Savings	\$100,000 in Annual Savings
